OPEN WORKSTATIONS

Optimize efficiency in your workplace with our open workstations. By encouraging collaboration and the exchange of ideas, these solutions not only improve productivity but also strengthen the sense of team.

Suggested Lines:

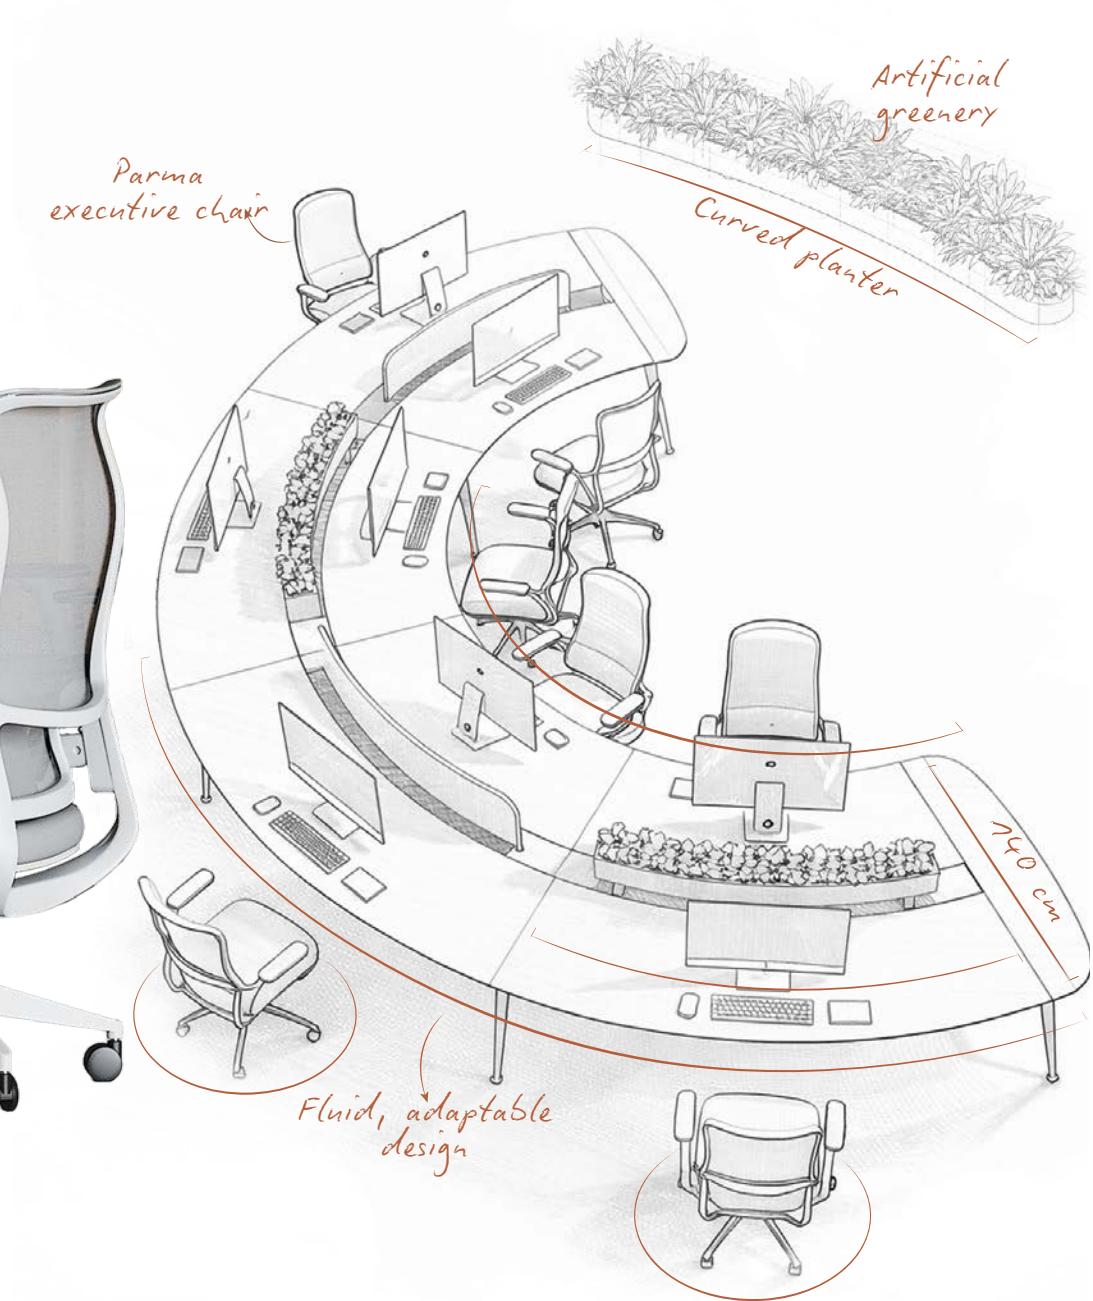

ANZIO® VASARI® aura
Livello® VETTA

aura

Configurations that evolve and connect

Aura workstations, with curved forms and versatile configurations, adapt fluidly to every working dynamic in open spaces.

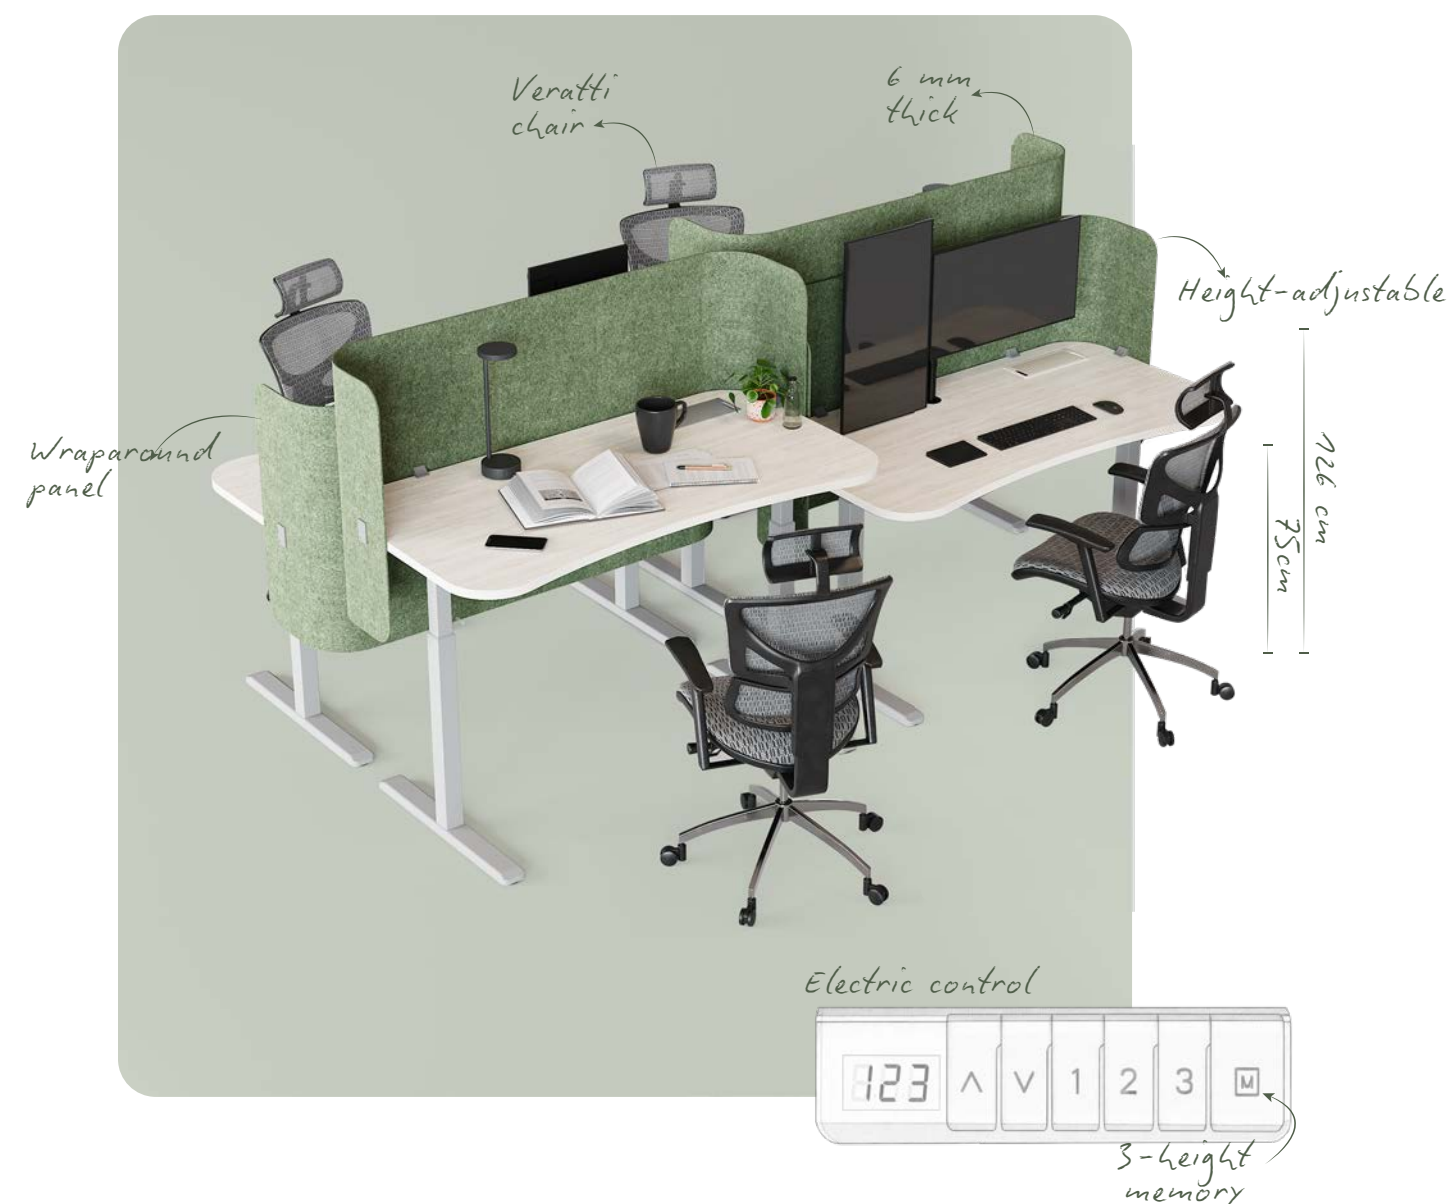

Aura transforms the operational space with curves that replace rigid angles with fluid pathways, while **Acusto booths** bring acoustic privacy into the same open environment.

Images are for illustrative purposes; color may vary from the final product.

Modularity that adapts to the rhythm of the day

Livello **height-adjustable desks** combine precise height adjustment with acoustic panels that define the space without closing it off, keeping the body active and concentration intact.

An open system that organizes and connects

Filio organizers with integrated planter define work zones without interrupting visual continuity, while Livello height-adjustable desks keep the open space operationally dynamic.

Images are for illustrative purposes; color may vary from the final product.

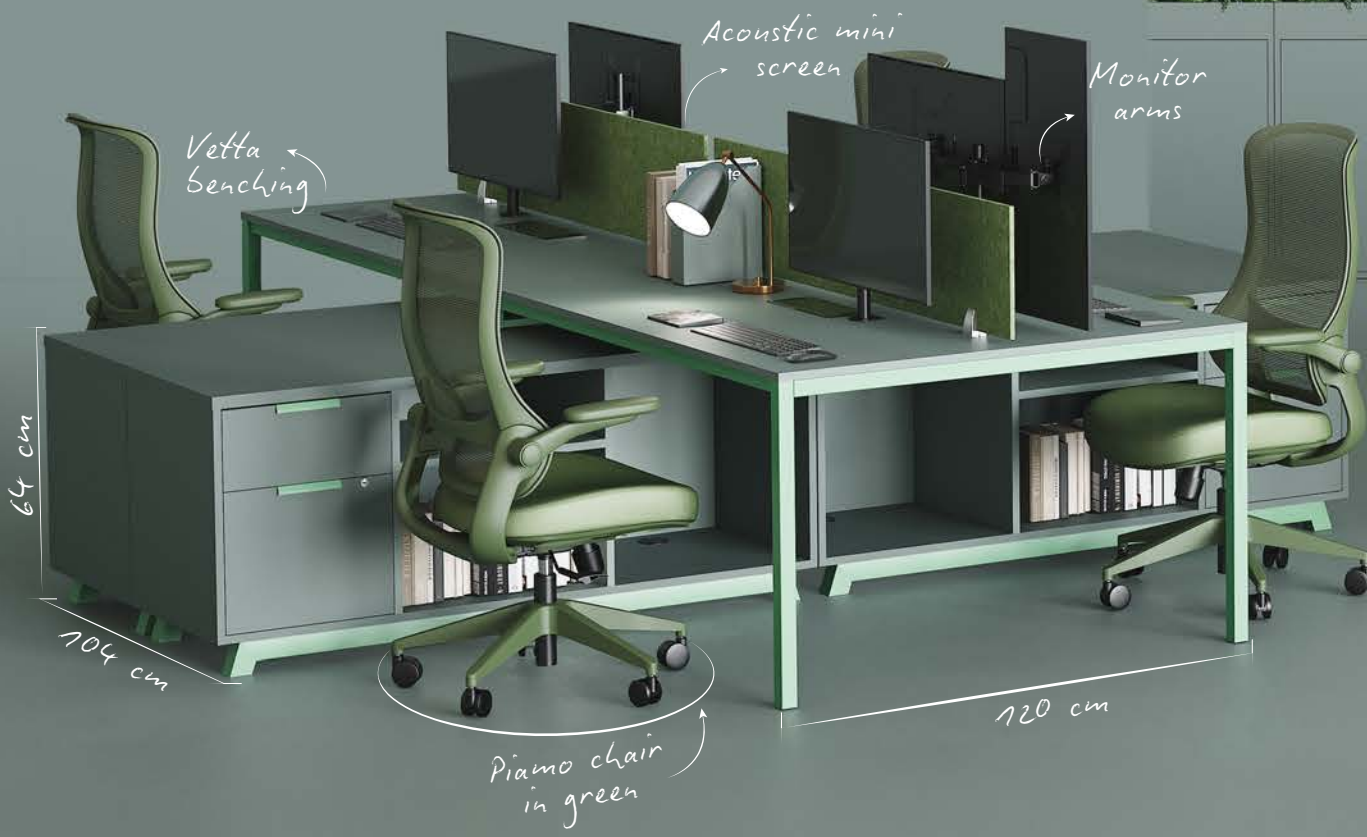

Circular architecture for collaboration

Aura workstations in a circular configuration optimize direct communication, **integrating artificial greenery** at the central core to create a high-performance collaborative environment.

Open structure, defined focus

Vetta workstations organize teams under a modular scheme that balances collaboration and concentration, while dividers with **Filio artificial greenery** define areas without interrupting the flow of the space.

Control of the space, clearly defined

Anzio organizes the space with aligned desks and under-surface storage, incorporating front screens that define without blocking visibility and maintain **continuity with the collaborative environment**.

Anzio credenzas integrate into the workstation as a direct extension of the work surface, concentrating **support surfaces** and immediate storage for continuous operation.

A workstation that is easy to grow

Vento task chair

Acoustic screens

Anzio credenzas

Modularity that adapts to each team

Open workstations offer configurations ranging from linear benching to circular layouts, adapting geometry and scale to the operational needs of each workspace.

ENCLOSED WORKSTATIONS

Experience the perfect balance between interaction and wellbeing throughout the workday. With adaptable configurations and modern structures, these workstations adjust to the company's operational needs, offering privacy without compromising functionality.

Suggested Lines:

Sett. i-WORK® **Privatt.**

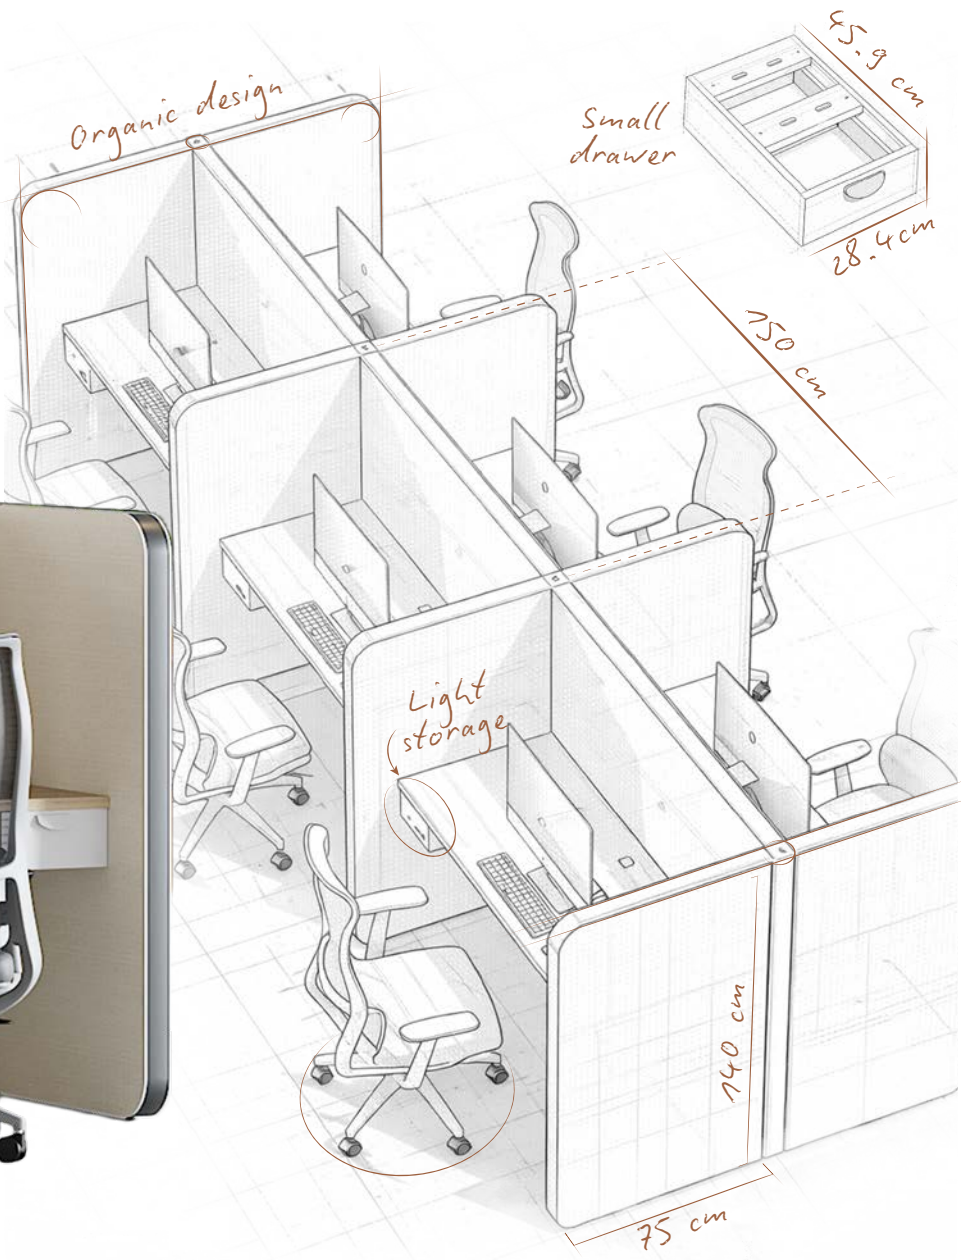

Sett.

Enclosed workstations, privacy that flows

Setto workstations combine organic design and a lightweight structure to create private work spaces with acoustic control, maintaining visual order and flexibility in the environment.

Setto low-height dividers structure the workstations without closing off the space, establishing **functional boundaries** between users while maintaining **visual continuity** with the social and collaborative zones.

Accessories that transform the space

Setto accessories have been designed to integrate naturally into every configuration, allowing the **work environment to be personalized** without compromising aesthetics or functionality.

Structured privacy, efficient concentration

Setto and i-Work define individual space using screens, creating work environments that support concentration without losing visual continuity within the office.

Setto
i-WORK

Configurations that grow
at the pace of the operation

Setto and i-Work offer modular configurations with no floor
fixing, allowing enclosed workstations to be expanded or
reconfigured quickly as the team's needs change.

Modular lounge seating

Modular storage

Plastic laminate

Polycarbonate panel

Side table

Setto screens

No floor fixing required

I-WORK configurations make it possible to replicate enclosed workstations continuously, maintaining order and efficiency in intensive work environments.

Privacy that structures the work

Enclosed workstations organize the space through modular configurations that define each position clearly, **supporting concentration** without breaking the team's operational dynamic.

ACOUSTIC SPACES

Improve concentration and reduce distractions in the office with our acoustic booths. Designed to deliver sound insulation and privacy, creating an ideal environment for video conferences, calls or uninterrupted individual work.

Suggested Lines:

ACUSTO

ACUSTO

When silence becomes a space

Acusto brings **privacy into open spaces**, creating areas for concentration and uninterrupted meetings. They deliver **acoustic insulation**, comfort and functionality without altering the dynamic of the environment.

Details that make the difference

The **control panel** is a system designed to simplify daily use, **allowing ventilation, light intensity and light tone** to be adjusted from a single point.

Ventilation control

Controls internal airflow.

Light intensity level

Adjusts the lighting to your preference.

Light color graduation

Shifts the light tone from warm to cool.

Main switch

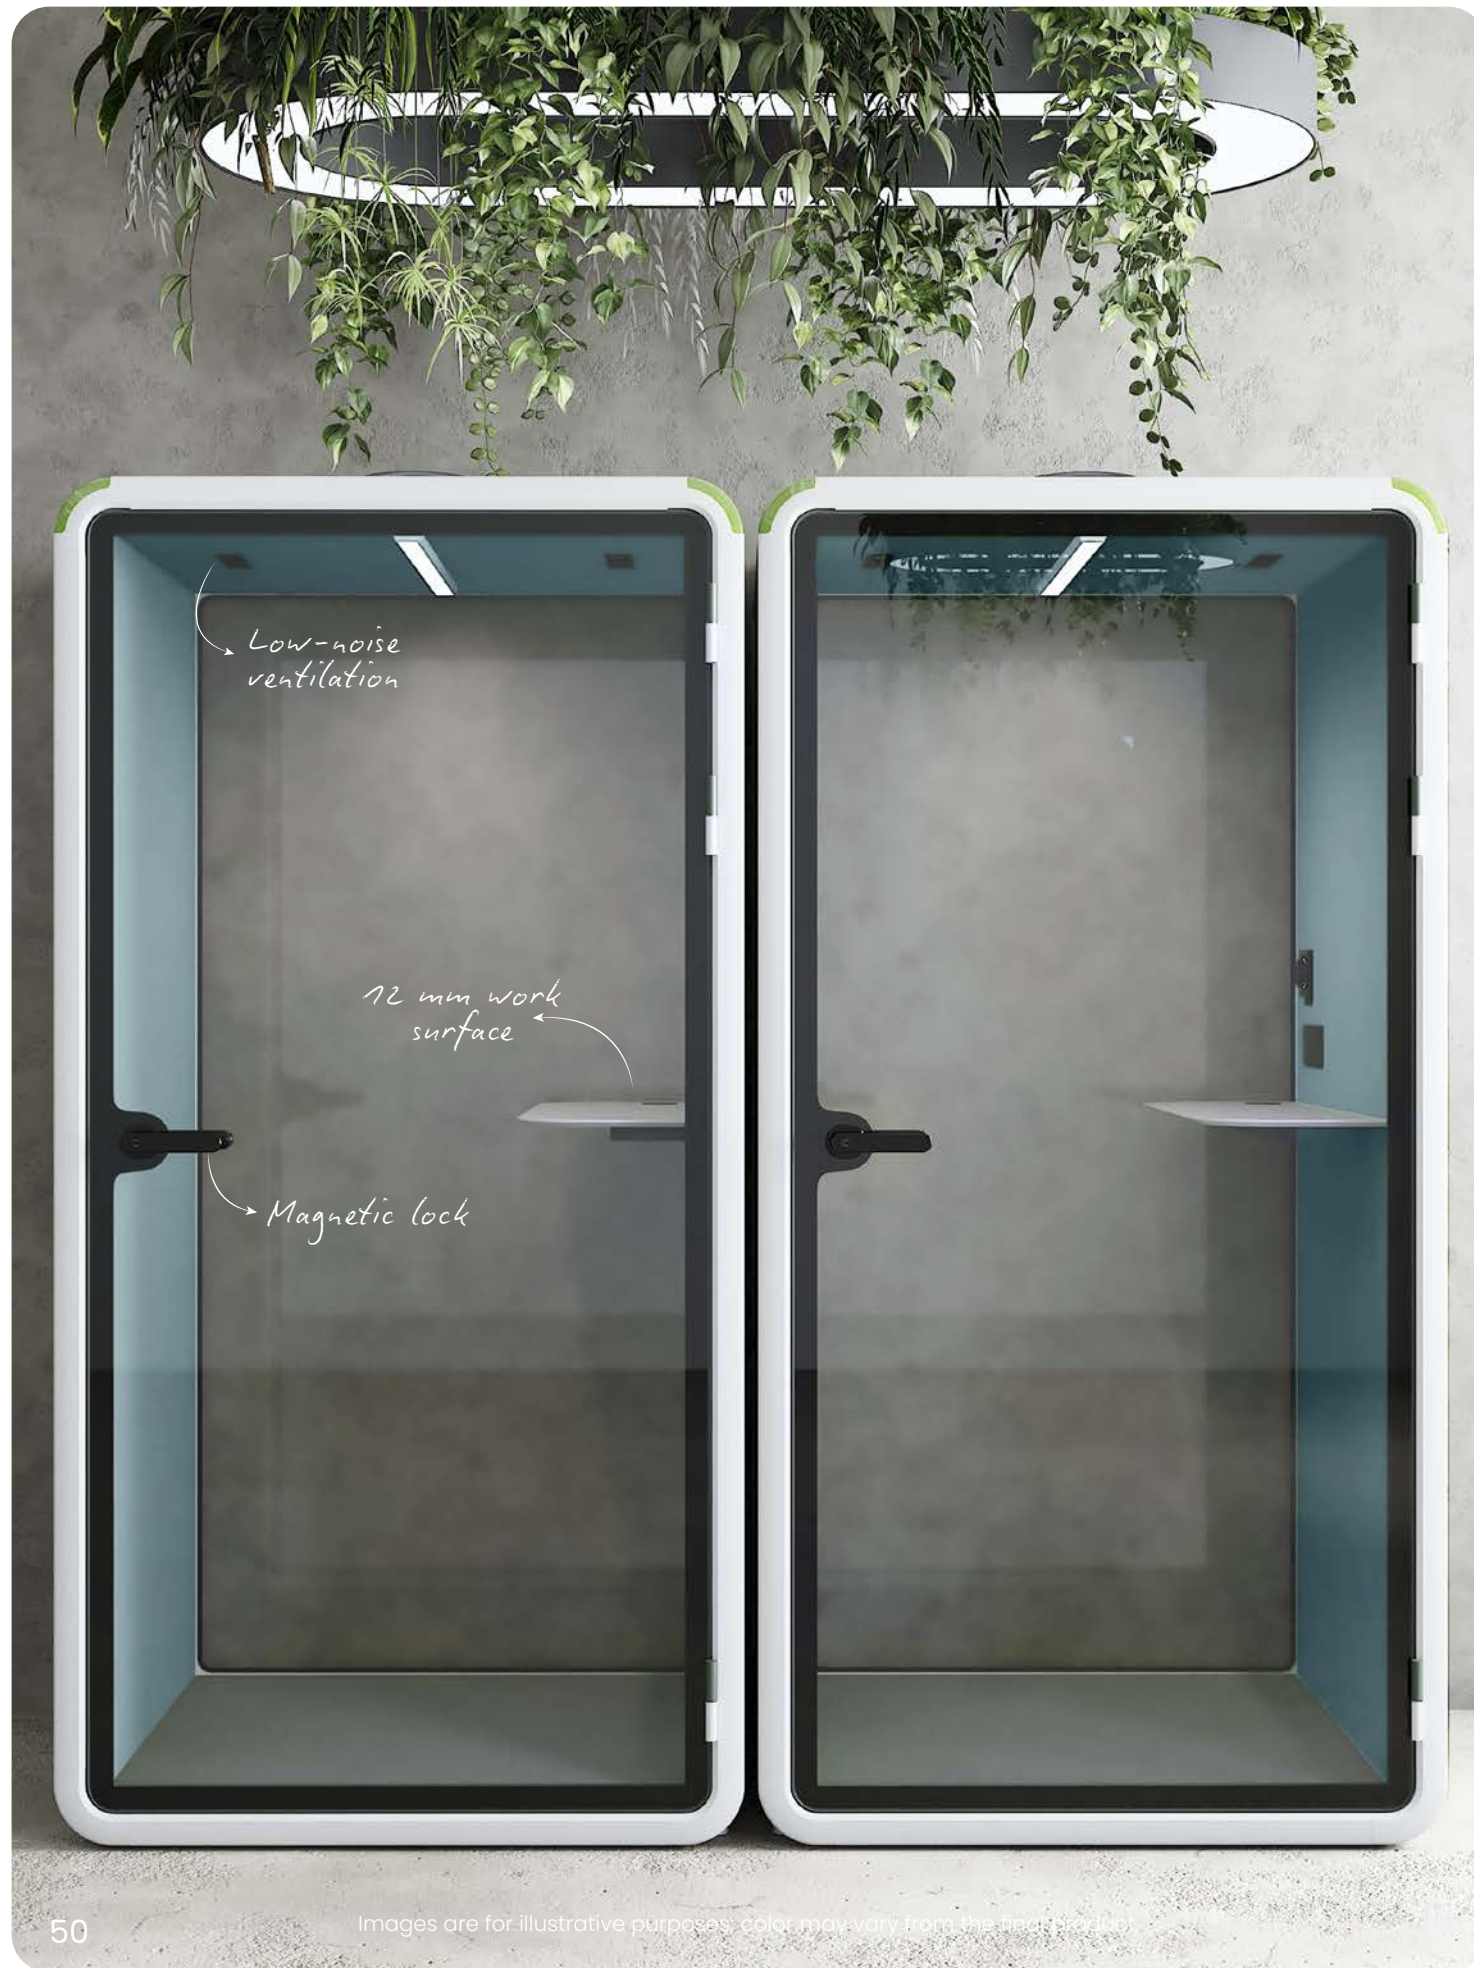

Controls general on and off.

Comfortable and functional
whatever the noise

Integrates ventilation, lighting and customizable configurations in one adaptable system. Its acoustic insulation reduces outside interference, supporting concentration and performance.

Model S

Capacity 1 person

1 m² booth, ideal for calls, focused work or moments of meditation. Its elegant, versatile design makes it easy to integrate into any space.

The different configurations allow the space to accommo-
date a range of **meeting dynamics**, from **brief encounters**
to **longer working sessions**.

Images are for illustrative purposes; color may vary from the final product.

Meetings that grow with the team

Aura meeting tables evolve alongside the team’s needs thanks to their **modular extension system**. The structure integrates cable management to keep the space functional, clean and visually orderly.

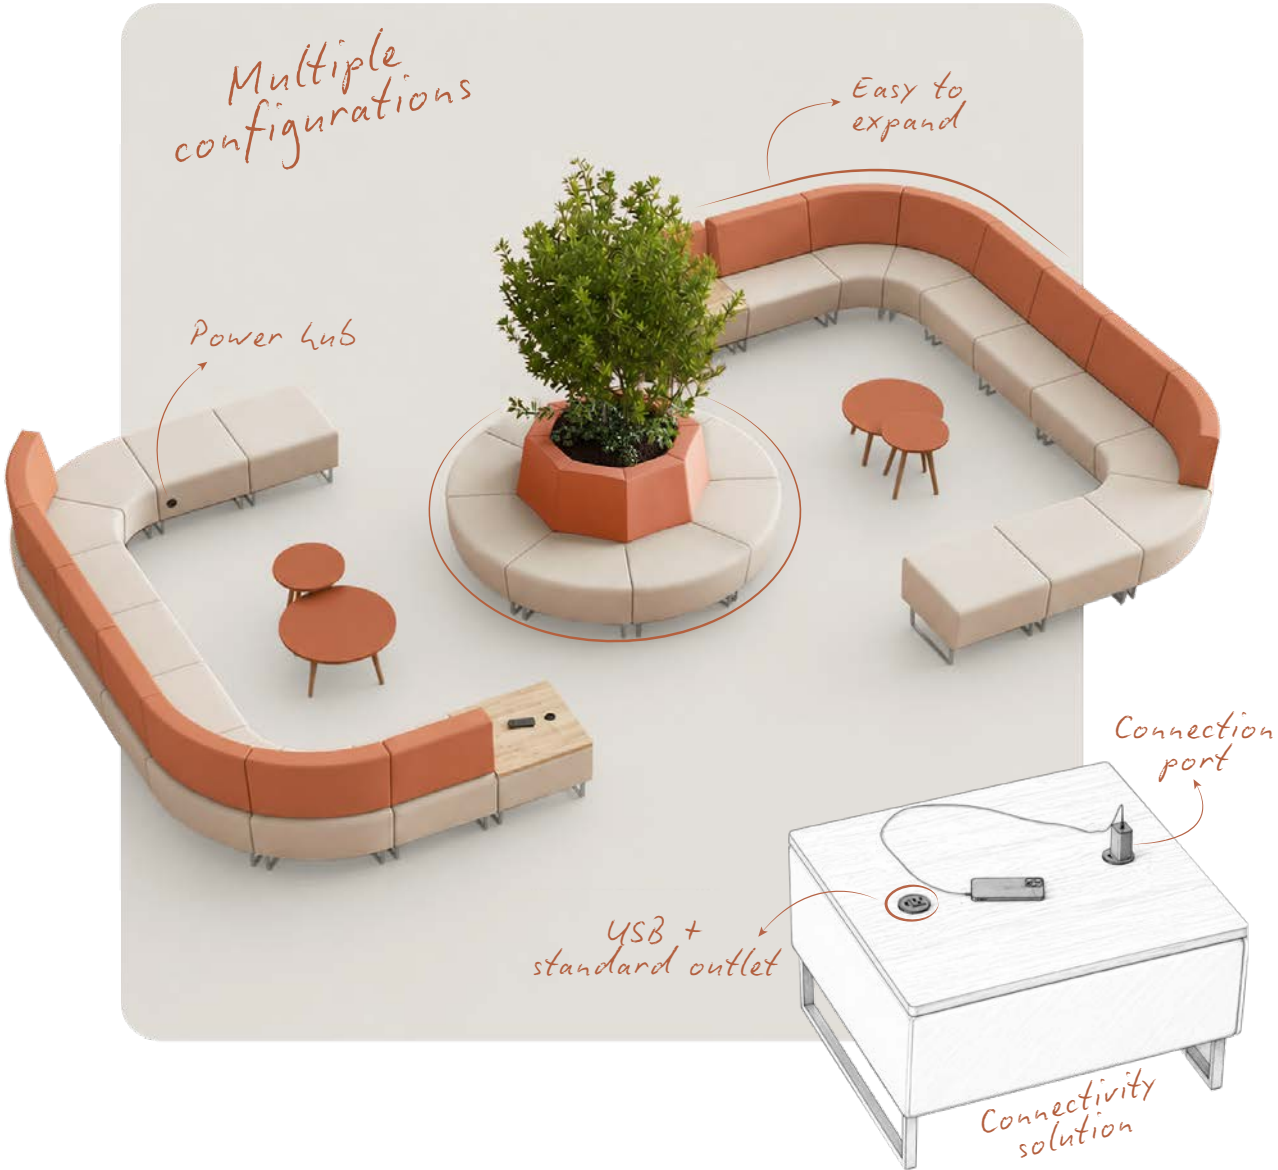

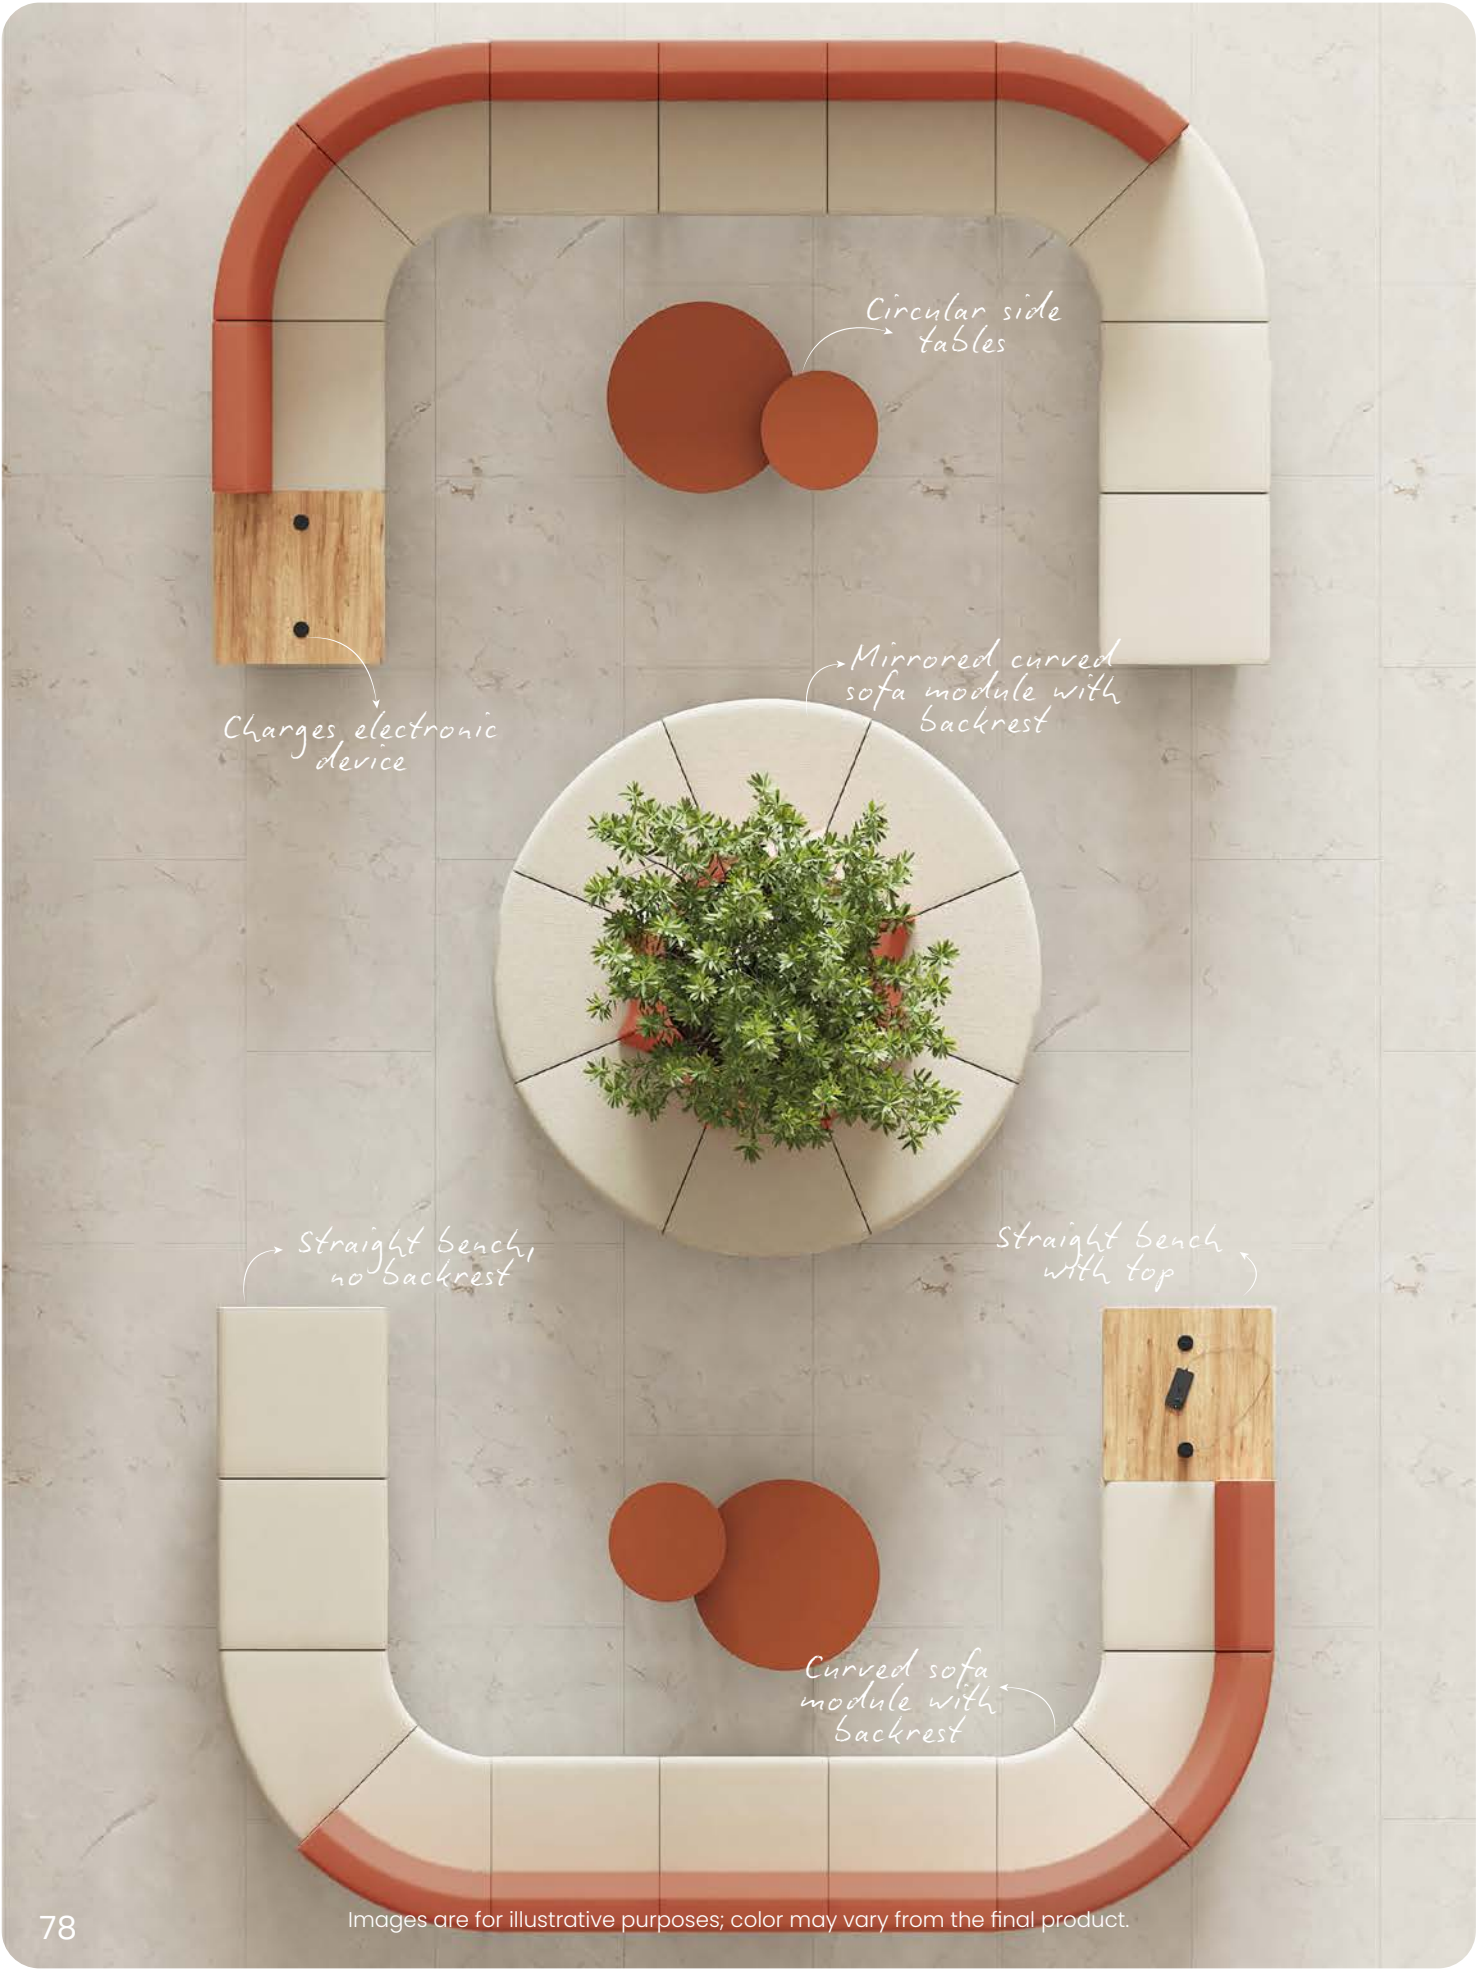

The integration of **Aura**, **Attesa**, **Filio** and complementary solutions creates dynamic, organized, visually balanced meeting points, connecting **interaction and functionality within a single system**.

Waiting zones that connect

Attesa creates comfortable, orderly and contemporary reception and waiting areas. Its **modular design** and integrated power outlets make it possible to create **functional spaces** where waiting can also be productive.

Well-defined waiting spaces

Waiting spaces are organized as **flexible environments** where different uses **coexist naturally**.

Attesa, through its modular configuration, **makes it possible to create microenvironments** that integrate seating, side tables and greenery, balancing concentration, rest and encounter.

ACUSTO

Non-standard frame colors are available with a minimum order of 5 to 10 pieces, depending on booth size.
MD finish: the MD wood-look finish applies only to the panels, not to the perimeter structure.

The interior panel and ceiling upholstery of the Acusto line is supplied in a single color.
Creaciones Industriales S.A. de C.V. warrants its products for 5 years, under normal assembly and use conditions, against defects in materials and workmanship (see warranty policy).
For chairs, see the coverage periods, terms and conditions applicable to each model.
